I don't have the form on my hard drive but I have requested from my HQ contact to email me the form. I will forward it to you when I get it. If he isn't in the office today, I will sent it to you tomorrow from the office.

Yes, we can try to HQ approach first. What do you need from me?

Or we can submit a request to my HQ person and he can see what they have access to. It doesn't cost to do that.

Lance –

Your call, just check with Lydia if the \$\$ are available (maybe when you meet with her?).

Is Wilcox located in LA? I have had a little luck getting some historical photos from DOT for free if they have them but just for LA. If you want to pursue checking on what Lockheed may have or have access to get, then of course I need you to fill out a form. Let me know if you want to do that.

Lance may need them for Wilcox Oil. For this purpose I'm sure Lydia would provide some enforcement money if Lance wanted to pursue this approach.

Hi Kevin.

That is an interesting question. We still have access to aerial photos but it is handled differently. I no longer had a budget for aerial photos, so funding will have to come from Carlene or enforcement and to a person in HQs that does all the coordination. You can submit a request to see what historical photos that they may have or may be able to get. What site are you needing photos on?

Hi LaDonna –

Is the Lockheed contract for aerial analysis still active, or is it finally done? If it's closed out, do you know of any alternatives for aerial photographs that are as old as possible (pre-1950s be best). Lance may have a need to obtain them.

Thanks
Kevin
